FOR IMMEDIATE RELEASE

ERC DATAPLUS PARTNERS WITH TEAMSCREEN SOLUTIONS TO DELIVER ATS SERVICES TO BACKGROUND SCREENING COMPANIES

A Fully Integrated Applicant Tracking and Background Checking System Now Available To TeamScreen Licensees

Norwalk, CT. --- (September 23, 2008) --- ERC Dataplus, Inc., a leading provider of recruiting software solutions, has established an integration partnership with TeamScreen Solutions LLC, a leading technology solutions provider to the background investigations industry. The partnership will integrate ERC's applicant tracking software, Selectech® Workforce Management, with TeamScreen's MyScreen™ Web-based solution and enable their background screening companies to offer a unique integrated talent management and background screening solution to their clients without any additional client cost for integration.

The integrated solution gives TeamScreen's licensees the ability to offer their customers a private-branded (White-Label) integrated talent management and background screening solution. This solution will meet the needs of human resource professionals and hiring managers at companies both large and small, providing them with a single platform for pre-qualifying, assessing, appointment scheduling, on-boarding, and background screening.

In addition, this integrated solution is being offered to TeamScreen's business partners with their own branding, to provide an additional avenue for attracting new clients, growing their business with new sources of revenue, increasing their share of background checks, and improving their overall competitive position.

With Selectech Workforce Management, the entire recruiting process from requisition approval through offer letters and on-boarding will take place directly from the recruiters desktop. The integrated solution, which also includes Selectech Pre-hire Assessments, improves the recruiter's ability to identify the best candidates and reach them more quickly, giving users of this system a competitive edge in the hiring of new employees. The efficiencies and productivity gains will more than pay the cost of the applicant tracking system. Applicant information from Selectech Workforce Management can be automatically sent to TeamScreen's background screening licensees for processing of background checks and their clients will be automatically notified when reports are available for review.

"We are extremely pleased to have been selected by TeamScreen, a leading solutions provider to the background investigations industry, to deliver an integrated talent management system to the companies that utilize their background screening technology," said Vice President - Business Development for ERC Dataplus, Carla Knoll. "This partnership will be beneficial for both of our respective organizations by broadening the base to which ERC's products will be implemented and for TeamScreen and their licensees, an opportunity to address a set of business requirements with this addition to their suite of technology solutions for background screening," she added.

"We are continually looking to partner with leading solution providers to further enhance our licensee's competitive advantage. Selecting ERC Dataplus as a partner became an easy decision. In addition to providing outstanding products, they back them up with excellent customer service. Their Selectech Workforce Management system adds another arrow in the quiver for our background screening companies," said Steve Wolfe, president of TeamScreen

Solutions LLC.

TeamScreen licensees wanting to learn more about ERC's Reseller Solution and how the integration works may call 1-800-341-6636 or email info@SelectechPowered.com.

About TeamScreen Solutions

TeamScreen Solutions is an information management specialist committed to providing fast, accurate and inexpensive search information for all pre-employment screening needs. We have spent years developing our technology in order to meet the demands of today's market where both time and accuracy are essential. We stay current by continually researching new ways to improve our service and advance technologically. Once found, we implement new information exchange approaches for the benefit of our clients.

The TeamScreen Solutions management team is comprised of human resource, pre-employment, and web technology professionals. We currently serve all markets with our pre-employment services and maintain industry specific expertise either directly or through strategic partnerships and associations to ensure the highest quality service.

Our management team understands pre-employment screening demands uncompromised accuracy and the best possible turnaround times. These demands are why TeamScreen Solutions has developed web-based services. We are committed to improving our service by implementing new approaches for information exchange to reduce turnaround times and costs whenever possible.

TeamScreen, based in Overland Park, Kansas, has a national presence and service delivery capability. We are fully insured and are a full-service, consumer-reporting agency in compliance with the Fair Credit Reporting Act.

About ERC Dataplus

ERC Dataplus, an affiliate member of the National Association of Professional Background Screeners, delivers Web-based HR management solutions that help organizations improve their hiring processes and results. Since 1993, ERC has enabled leading financial service firms, call centers, retailers, hospitality organizations and Fortune 2000 companies to automate and enhance their employee recruitment, selection, development and retention.

ERC's comprehensive solutions help manage the entire hiring process from applicant pre-qualification, assessment and interview coordination through on-boarding. In addition to saving time and limiting administrative burdens associated with high-volume employee recruiting, ERC solutions improve the quality and quantity of qualified candidates, reduce turnover, fill openings more quickly and provide analytics that allow organizations to better manage and measure all hiring-related activities.

ERC also offers post-hire HR technology through its performance management and multirater assessment applications, talent inventory management, and employee surveys (new hire, exit and climate surveys).

ERC's applications are modular in design and easy to use allowing clients to select what they need, when they need it. To learn more about ERC and its portfolio of cost effective staffing solutions visit www.ercdataplus.com or call 1-888-ERC-CORP (372-2677).
